RESCUE BOOSTER PACK LIMITED WARRANTY

Do Not Return the Booster & Power Supply To the Place Of Purchase.

The Manufacturer warrants this product against defects in material or workmanship for one (1) year from the date of original retail purchase. At our option we will repair or replace. This warranty does not apply to the battery or compressor. All battery and compressor replacements will be at the sole discretion of the manufacturer, and subject to visual and internal inspection. Any battery or compressor replacement will be on a prorated, escalating cost basis to the purchaser, prorated monthly for a 12 month period from the date of purchase (with proof of purchase), and increasing in 1/12th increments monthly up to the retail battery price set by the manufacturer. Batteries returned with melted terminals, due to under/over charging or misuse, will not be covered under warranty.

EXCEPT FOR THIS LIMITED WARRANTY, THE MANUFACTURER HAS NOT MADE AND SPECIFICALLY DISCLAIMS ANY WARRANTY OR REPRESENTATION OF ANY KIND, EXPRESS OR IMPLIED, DIRECT OR INDIRECT, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY, AND ANY IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE. THIS LIMITED, CONDITIONAL WARRANTY PROVIDES THE EXCLUSIVE REMEDY FOR ANY CLAIM OR DAMAGE EXCEPT AS OTHERWISE REQUIRED BY LAW.

This warranty excludes and does not cover defects or failures of your BOOSTER PACK due to any cause other than defects in material or workmanship, including without limitation any malfunctions or failures caused by repairs made by an unauthorized person, mishandling, modifications, normal wear, improper storage and unreasonable use or damage.

IN NO EVENT SHALL THE MANUFACTURER BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES. Some states do not allow the exclusion or limitation of incidental or consequential damages so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

Any claim relating to the Booster Pack must be submitted within one (1) year of purchase and must be sent to Quick Cable in the U.S.A or Canada.

If any portion of this warranty or limitation of rights and remedies is found to be unenforceable, then the remainder of this document shall remain in full force and effect.

To obtain service under this warranty:

1. Call Technical Service toll free in U.S.A. 1 (800) 558-8667 or in Canada 1 (800) 728-1742. Have your booster & power supply near the phone and a technician will help you diagnose the problem.
2. When an in-warranty battery is in need of replacement, you must send or fax a copy of your purchase receipt to Technical Service. They will provide you with the fax number or address. A replacement battery will be sent to you freight prepaid, and you will be charged for the prorated amount on your credit card.
3. When an out of warranty battery is in need of replacement, the replacement battery will be sent to you freight collect or prepaid and added to your invoice.
4. You are responsible for the replacement of the battery and taking the defective battery to the proper site for recycling.
5. **Any misuse of this unit will void this warranty.**

IT IS ILLEGAL TO DISPOSE OF LEAD ACID BATTERIES IN THE TRASH!

For disposal and/or recycling in your area, please call 800.253.2687 or go to www.cleanup.org.

If your booster & power supply is out of warranty, and fails, it may not be economical to repair. Before disposing of unit, disassemble, remove battery and recycle.

Quick Cable Duffle Bag	602565-001
Complete Kit/2020 Booster Pack, includes cables 602564-001, 602563-001, 602562-001, Quick Cable duffle bag and 4-in-1 screwdriver (Does not include extension Part No. 602560-001)	602566-001

2020 BOOSTER
PACK

1. The booster pack should always be in the OFF position until you are ready to boost your vehicle or aircraft.
2. Pick your power connectors based on your application and plug the assembly into the back of your Model 2020 booster pack. Be sure your booster pack is turned off.
3. Choose the correct voltage setting for your application (12V or 24V).
4. Connect your booster pack cables to your vehicle or aircraft (follow the booster pack instructions).
5. Turn booster pack on.
6. Start your vehicle or aircraft.
7. Turn booster pack off.
8. Remove the cables.
9. Recharge your booster pack. (Use the 12V setting only.)

PERFORMANCE GUIDELINES

For best results when using your Booster Pack:

- Clean the battery terminals or posts before connecting the clamps to the vehicle battery. Use a battery post cleaner brush to remove corrosion from the battery terminals or posts. Two QuickCable cleaners are recommended for cleaning terminals, posts and cables. Solutions 510420 and 510430 will neutralize the gray/white powdery corrosive material. (See quickcable.com for more information).

WARNINGS: Possible explosion hazard. Contact with battery acid may cause severe burns and blindness. KEEP OUT OF REACH OF CHILDREN.

- Always wear safety glasses when working with or around lead acid batteries.
- If splashed by battery acid, immediately flush the area of the splash with clean water; if a burning sensation is felt or any blistering occurs, seek medical help. If acid is splashed in the eyes, flush eyes with clean water continuously and seek medical help.
- All lead acid batteries generate hydrogen gas during normal operation. This process increases during a rapid discharge period such as when using for jump-starting. Hydrogen gas and battery acid (sulfuric acid) can be:
 - Explosive
 - Corrosive and will burn skin, eyes and hair
 - Damaging to unprotected metals
 - Poisonous to breath
 - Highly flammable
 - Damaging to natural fiber clothing

To avoid exposure to battery acid or the possibility of an explosion:

- Follow all instructions in this manual and your vehicle's manual.
- Only use your Booster Pack in a well-ventilated area.
- Observe all warnings.

TROUBLESHOOTING

- Check your vehicle battery terminals or posts to make sure they are clean and free of corrosion.
- Check cable clamps are clean and free of debris.
- Make sure your connections are secure before starting the vehicle. Twist or rock the clamps slightly until you can feel a tight connection.
- Check the battery status to make sure it is at HIGH or FULL CHARGE prior to jump starting your vehicle. If not, charge Booster Pack immediately.
- If your Booster Pack will not hold a charge, check the battery Replace dead batteries and charge unit.

WARNINGS

- Turn Booster Pack OFF to store; store upright.
- Do not use the Booster Pack if the cable, clamp or power cord is damaged.
- Avoid short circuit of the product: Don't touch the clamps to any conductive material.
- Don't store Rescue Booster Pack in places where the temperature could exceed 120°F.
- Repairs should be carried out by experts (only use authorized repair centers). Attempts to repair unit by untrained persons may be very dangerous.
- Always attach clamps to battery when the unit is OFF. If the alarm sounds you have reversed the clamps. Disconnect the clamps & reattach to the opposite posts. When clamps are attached & there is no alarm, it is safe to turn on.
